

Science Challenge—Task 3

Beegu has spotted some interesting animals and creatures on Earth but doesn't know where they live. Write an animal or creature in each habitat and write why they choose to live there.

E.G A camel lives in the desert because it is hot and dry. They can survive there because their fur is thick. This protects them from the sun in the day and keeps them warm at night. They have large feet that helps them walk on sand. They have a hump to store lots of food and water because there isn't much food and water in the desert.

 <p>pond</p>	 <p>field</p>
 <p>sea</p>	 <p>forest</p>
